ABOUT ME

A motivated CSE student and practical web professional with hands-on experience in WordPress development, Fiverr sales, client communication, hosting troubleshooting, domain and DNS management, SSL setup, website migration, and resolving common website technical issues.

EXPERIENCE

Freelance WordPress Developer

1 Year 10 Months

- Build and customize WordPress websites based on client requirements.
- Work with Elementor to design and develop modern, responsive websites.
- Manage website edits, content updates, and layout changes.
- Handle website migration, backup, and restoration.
- Fix hosting-related issues and ensure website stability.
- Support domain, DNS, and SSL setup for live websites.

Fiverr Sales & Client Handling

1 Year 2 Months

- Communicate with clients to understand their requirements and project goals.
- Prepare professional offers and clear, effective responses on Fiverr.
- Support lead conversion and order closing through proper communication and proposal writing.
- Coordinate project delivery, manage timelines, and handle revisions to ensure client satisfaction.

Hosting & Technical Support

Practical Experience

- Solve hosting and server-related issues, including downtime, access, and configuration problems.
- Troubleshoot and fix common website errors (e.g., 500 error, connection issues, plugin conflicts).
- Manage cPanel/hosting tasks such as file management, database, email, and basic server settings.
- Assist with malware/security issues and implement measures to keep websites safe.
- Monitor and improve website performance for better speed and reliability.
